Dear Sir

Thank you for your enquiry into the 2-day 'hands-on' intensive one to one locksmith course. We have enclosed a course prospectus, which gives a detailed view of what you can expect to learn each day.

To ensure we maintain the Industry approved standards on ethics and best practise, we are required to ask all delegates to submit information in relation to criminal records. This requirement is in place due to the potential conflicts of interest, which could easily arise whilst employed as a locksmith or security professional. (please attach the following to your booking form).

DECLARATION

Any convictions within the last seven years? YES / NO

Nature of offence.....

Have you ever been refused legal or security based training or employment in the past? YES / NO

If YES please supply reasons.....

Name:.....

Signature:.....

2 Day

Locksmith Training Course

Locksmith Course Overview

A two-day 'hands-on' intensive training course introducing each candidate into the world of picking, opening and bypassing a variety of popular domestic and commercial locks.

All courses take place at our training workshop in Birmingham, where we will provide each candidate with all the necessary tools, manuals and a business plan to enable YOU to successfully start & run a mobile locksmith business.

The lifestyle and earning potential for a locksmith is very lucrative as you set your hours as well as your prices. For example, weekend and night time work is an area that many locksmiths do not wish to cover. The realisation however is you can charge between £70 & £100 to open a standard Yale type lock at 8.00pm at night, and it will only take you 1 minute (we will show you). What is more we supply each candidate with a manual (developed and used by practising locksmiths) that will enable you to open over 95% of household mortice locks which the British Standards committee have classified as 'thief resistant' (again we will show you how).

For each candidate who completes the course we include a 12-month FREE dedicated technical support line, membership to the NNAL as well as free technical bulletin updates.
